New challenges in sexually transmitted infections: sexual health, prevention and more

The consequences of sexually transmitted infections (STIs) on both individual and public health can be severe. The increasing incidence of STIs demands a call to action to ensure that populations at risk have access to comprehensive STIs prevention and care, especially in the context of expanded use of pre-exposure prophylaxis (PrEP) for HIV prevention. Integration of STIs services and PrEP is challenging but also provides a unique opportunity to optimize broader sexual and reproductive health services.

Chairs: L. Badia (Bologna), G. Cuomo (Modena), R. Rossotti (Milano)

| | | |
|----------------------|---|-------------------------------------|
| 15.00 - 15.10 | Beyond PrEP: from a clinical management of STIs to a broader approach to sexual health | Maddalena Cordioli, Verona |
| 15.10 - 15.20 | Test and Same Day Treatment in HIV: the role of screening and early ART initiation in the management of HIV | Arturo Ciccullo, Roma |
| 15.20 - 15.30 | Empowering people for their sexual health: how U=U changed the sexual lives of people living with HIV | Daniele Calzavara, Milano |
| 15.30 - 15.40 | Focus on vaccinations: are they an effective tool of sexual prevention? | Margherita Digaetano, Modena |
| 15.40 - 16.00 | Discussion and conclusions | |
